INTERGRAF CERTIFICATION WORKSHOP

05/04/2022

AGENDA

AGENDA: WORKSHOP

05/04/2022 - Room Saint-Clair 3A

Let's talk about certification - All about the new ICR (Intergraf Certification Requirements)

Chapters B and E of the Intergraf Certification Requirements (ICR) of ISO 14298 have recently been updated. Chapters B and E have been completely revised to reflect new technological developments and to align with ISO 27001 (outsourcing of IT services, asset-based approach, etc.)

This certification workshop will shed light on the background, answer any particular questions you may have, and give you a chance to get to know your peers from other companies certified by Intergraf.

Look forward to an interesting afternoon, with a good mix of food for thought, industry news and insights into certification.

You have specific questions you would like to ask? Let us know *before 30/03/2022* at certification@intergraf.eu.
